Gloucester Engineering Co. Selects Infor ERP SyteLine & Copley Consulting Group

GLOUCESTER, MA April 26, 2011 - Gloucester Engineering Co. is pleased to announce the selection of Infor ERP SyteLine as their ERP solution. Copley Consulting Group will manage implementation of the new system.

“We conducted an in-depth review of ERP solutions available on the market considering a large array of factors inclusive of functional fit, deployment options, advanced technology, ease of implementation and local support. The culmination of this process led to our selection of the Infor ERP SyteLine solution with The Copley Consulting Group as our implementation partner,” said Adrian King, Gloucester VP of Finance. “The experience of the Copley Team in deploying SyteLine and the availability of SyteLine in a true SaaS model were major elements in our decision to move forward with the Infor ERP SyteLine Solution.”

“The ability to offer SyteLine in both a traditional on-premise model and in a multi-tenet SaaS model continues to be a contributing factor in Copley’s and Infor’s capability to secure significant project wins like Gloucester Engineering. It is with great pleasure that we welcome Gloucester to the Infor ERP SyteLine user community,” added Copley’s CEO Bob Lane.

About Gloucester Engineering Co.

Since its inception in 1961, Gloucester Engineering Co. has been a global leader advancing quality and production limits in the plastics extrusion and converting market. GEC offers a range of innovative systems and component solutions, for both new lines and retrofits, that provide customers a competitive edge in applications that include bag making, foam and sheet extrusion, blown and cast film extrusion and extrusion coating. GEC manufactures its equipment from its headquarters in Gloucester, MA, and through its joint-venture company in Damman, India, Kabra Gloucester Engineering.
